

THE TENANT ENGAGEMENT PLAYBOOK.

HOW LEADING PROPERTIES DRIVE TENANT
SATISFACTION, COMMUNITY, AND OCCUPANCY.

OVERVIEW:

Inside this playbook you'll learn how
leading office properties:

- ✓ Activate tenant amenities with structured programming
- ✓ Increase tenant participation and workplace satisfaction
- ✓ Turn engagement into a renewal and leasing advantage
- ✓ Track tenant engagement performance across buildings
- ✓ Build a repeatable tenant activation system

Download the full playbook to learn how leading office properties
turn tenant engagement into a measurable performance asset.

THE TENANT ENGAGEMENT PLAYBOOK.

HOW LEADING PROPERTIES DRIVE TENANT
SATISFACTION, COMMUNITY, AND OCCUPANCY

OVERVIEW:

Inside this playbook you'll learn how leading office properties:

- ✓ Activate tenant amenities with structured programming
- ✓ Increase tenant participation and workplace satisfaction
- ✓ Turn engagement into a renewal and leasing advantage
- ✓ Track tenant engagement performance across buildings
- ✓ Build a repeatable tenant activation system

Download the full playbook to learn how leading office properties turn tenant engagement into a measurable performance asset.

INTRODUCTION

Commercial office buildings are no longer competing only on location and square footage.

Today, tenants evaluate the **experience of the building**, the energy of the community, the value of amenities, and how the property supports their employees returning to the office.

The most successful properties are responding by treating **tenant engagement as an operational system**, not a series of occasional events.

This playbook introduces a **four-pillar tenant activation framework** used by high-performing office properties to:

- Increase tenant participation
- Strengthen tenant satisfaction
- Improve renewal conversations
- Support leasing differentiation

When executed consistently, tenant engagement becomes more than programming, it becomes a **measurable asset that strengthens property performance**

WHAT THIS PLAYBOOK DELIVERS

This strategic framework is designed for Commercial Property Managers, Leasing Teams, and Asset Managers committed to transforming tenant programming into a measurable performance asset. It highlights how thoughtfully designed tenant experiences can support broader property goals and drive long-term value.

WHAT YOU WILL LEARN

- How high-performing properties structure tenant engagement systems
- The four pillars of a repeatable tenant activation strategy
- How engagement improves the tenant retention and leasing performance
- Communication systems that consistently drive participation
- Operational standards that elevate the tenant experience
- Simple performance metrics that turn programming into an asset-level KPI

THE CHALLENGE

TENANT ENGAGEMENT FAILS WITHOUT SYSTEMS

Low attendance at tenant activations is rarely a **content problem**. It is almost always a system problem.

Properties struggling with engagement typically lack:

- consistent communication systems
- clear operational ownership
- structured feedback loops

High-performing buildings treat tenant engagement like an **operating discipline**, ensuring every activation reaches the right tenants at the right time.

WHY TENANT ENGAGEMENT MATTERS NOW

Leasing Differentiation

Prospective tenants increasingly evaluate the **building experience**, not just the floorplate.

Renewal Leverage

Documented engagement strengthens renewal conversations and reinforces perceived value.

Ownership Reporting

Measurable engagement performance strengthens asset-level reporting to ownership.

THE FRAMEWORK

THE TENANT ENGAGEMENT SYSTEM

High-performing office properties consistently apply four operating disciplines that transform tenant engagement from occasional programming into a **repeatable performance system**.

PILLAR 1 Tenant Signal Discipline

Systematically capture tenant preferences, schedules, and in-office patterns to align programming with actual demand.

PILLAR 2 Communication Consistency

Deploy a multi-layer, multi-touch cadence that builds awareness and attendance before event day arrives.

PILLAR 3 Frictionless Delivery

Eliminate operational barriers so tenants experience seamless, professional execution every single time.

PILLAR 4 Performance and Review Rhythm

Track, review, and refine activation performance monthly to build a compounding engagement asset.

SELF ASSESSMENT

Before installing the playbook, assess where your property stands today. Rate each pillar from **1–5** based on how consistently it operates in your building. This diagnostic highlights the **highest-impact improvements for the next 90 days**.

Pillar	1	2	3	4	5
Tenant Signal Discipline					
Communication Consistency					
Frictionless Delivery					
Performance and Review Rhythm					

1 = No system in place | 3 = Inconsistent execution | 5 = Fully operational and repeatable

Action Step: Circle anything rated below a 3. That pillar becomes your 30-day focus area. Start with one pillar, install the standard, then move to the next.

PILLAR 1

ALIGN PROGRAMMING WITH TENANT RHYTHMS

Tenant Signal Discipline means building a structured process to understand **when tenants are actually in the building and what they value**. Properties that align programming with tenant rhythms consistently achieve **higher participation and stronger engagement**.

Quarterly Pulse Survey

Deploy a short 6-question survey each quarter to capture shifting preferences around timing, format, food, and interest areas. Keep it under 2 minutes to maximize response rate.

Identify Tenant Champions

Every building has informal influencers. Identify 2-3 tenant contacts per floor or company who will amplify invitations and drive peer attendance organically.

Map Industry Cycles

Understand your tenant mix. Law firms, tech companies, and financial services firms have vastly different busy seasons. Schedule programming around their availability, not yours.

Know Peak In-Office Days

Hybrid work has made Tuesday through Thursday the new activation window for most office buildings. Validate this with badge data or lobby observation before locking your calendar.

Discussion Prompt: What are your building's top 3 tenant segments and their busiest in-office days? Start there.

PILLAR 2

ATTENDANCE STARTS WEEKS BEFORE THE EVENT

Most properties rely on a single email announcement. High-performing properties deploy **multi-touch communication systems** that build awareness and anticipation across multiple channels. Tenant engagement improves dramatically when the communication becomes a **structured cadence rather than a one-time message**.

1

Property-Owned Channels

Lobby screens, tenant portals, building apps, and email newsletters. These are the channels you control and should anchor every campaign.

2

Tenant-Forwardable Content

Create messages designed for office managers and tenant champions to share internally. Make it easy for them to forward with a single click.

3

Day-Of Proximity Reminders

Elevator screen countdowns, lobby signage, and push notifications within the final 2 hours. Capture the tenants who forgot or are making a last-minute decision.

4

Post-Event Social Proof

Share photos, attendance highlights, and tenant quotes within 24 hours. Social proof from one activation becomes the marketing engine for the next.

Standard: Minimum 3-touch cadence per activation across at least 2 layers. Anything less and you are underinvesting in attendance.

PILLAR 2 APPLIED

YOUR 3-TOUCH ACTIVATION RHYTHM

A consistent communication cadence removes guesswork and ensures every activation benefits from **pre-event awareness** and **post-event reinforcement**.

Ownership Prompt: Who owns the communication cadence at your property? If the answer is unclear, that is your first gap to close.

PILLAR 3

EXECUTION QUALITY SHAPES TENANT PERCEPTION

Tenants judge the quality of an activation not just by the activity itself, but by **the experience surrounding it**. Operational friction, unclear signage, vendor confusion, delayed setup, reduces participation and damages trust. Seamless execution elevates the tenant experience and signals **professional building management**.

Space Confirmed 7 Days Out

Lock the activation location with no competing holds. Confirm furniture layout, AV requirements, and any special setup needs with a single confirmation email to all stakeholders.

Access Confirmed 72 Hours Out

Ensure all vendor credentials, loading dock reservations, and freight elevator bookings are completed. No vendor should arrive without a clear entry path.

Visible Signage from Elevator Bank

If a tenant exits the elevator and cannot immediately see where the activation is happening, you have a wayfinding failure. Deploy directional signage at every decision point.

Property Presence First 10 Minutes

A property team member should be visible and welcoming during the opening window. This signals professionalism and gives tenants a face to associate with the experience.

Discussion: What operational friction has impacted past activations at your property? Identify one recurring issue and solve it this month.

PILLAR 3 APPLIED

THE 72-HOUR ACTIVATION READINESS STANDARD

Every activation should pass a **72-hour operational readiness check**.

This checklist ensures vendors, spaces, signage, and internal teams are aligned before the event begins.

Location confirmed, furniture plan set, no competing bookings.
Room temperature, lighting, and AV tested and verified.

Space

Access

Vendor credentials submitted, loading dock time reserved, freight elevator booked, after-hours access arranged if applicable.

Directional signage printed and placement mapped from lobby through elevator bank to activation space. Digital screens updated with event details.

Signage

Setup

Vendor arrival time confirmed, setup timeline documented, contingency contact identified. Catering delivery window locked if food is involved.

Team member assigned to greet during the first 10 minutes. Backup contact identified in case of schedule conflict. Feedback capture method confirmed.

Property Presence

Standard: Print this checklist. Run it 72 hours before every activation.
No exceptions.

PILLAR 4

MEASURE WHAT MATTERS

Without a review system, tenant engagement remains **invisible to ownership and disconnected from leasing strategy**. Tracking engagement performance turns the programming into **a measurable building asset**.

1

Track Attendance and Repeat Rate

Log headcount at every activation and flag tenants who attend more than once per quarter. Repeat rate is the clearest signal that programming is resonating with your tenant base.

2

Capture 1-Question Satisfaction

Ask one question after each event: "How likely are you to attend the next activation?" A single data point collected consistently is more valuable than a lengthy survey completed rarely.

3

Collect 2 Tenant Quotes Per Month

Brief, authentic testimonials from real tenants. These become direct ammunition for leasing collateral, renewal presentations, and ownership reporting.

4

Hold a 15-Minute Monthly Review

Dedicate 15 minutes each month to review attendance trends, identify what worked, and adjust the next month's calendar. Short, structured, non-negotiable.

Programming becomes a leasing asset when it is visible, documented, and reviewed. Invisible programming has zero renewal value.

STRATEGIC IMPACT

FROM AMENITY TO ASSET

Tenant engagement becomes powerful when it is **documented, measured, and communicated**. When properly packaged, activation performance strengthens three critical conversations.

01.

Leasing Tours

Weave activation highlights into every prospective tenant tour. Show photos, share attendance data, and reference the calendar. Prospects want evidence of a vibrant building community, not a promise of one.

02.

Renewal Conversations

Include tenant testimonials and participation data in renewal packages. When a tenant sees their own team quoted and engaged, the renewal conversation shifts from cost negotiation to value recognition.

03.

Ownership Reporting

Deliver a monthly performance snapshot to ownership: attendance trends, tenant satisfaction scores, and notable quotes. This positions property management as a strategic partner, not just a service provider.

The bottom line: Documented activation performance strengthens leasing differentiation, accelerates renewals, and builds ownership confidence in your management team.

YOUR NEXT 30 DAYS

INSTALL THE 4 PILLARS

Frameworks only create value when they are **installed into operations**. Use the next 30 days to install these four systems within your property. Commit to clear ownership and calendar deadlines.

Survey Date

Schedule your first quarterly tenant pulse survey. Pick a date within the next 2 weeks and distribute the 6-question template to your tenant contact list.

Communication Owner

Assign one person who owns the 3-touch cadence for every activation. This role must have clear authority over messaging, timing, and channel selection.

Ops Checklist Owner

Assign one person who will runs the 72-hour readiness checklist before every activation. This is your quality control gate and cannot be skipped.

First Monthly Review

Schedule a 15-minute review on your calendar for 30 days from today. Invite the communication owner, ops owner, and property lead. Make it recurring.

High-performing properties don't hope for attendance. They engineer it.

IMPLEMENT THE TENANT ENGAGEMENT PLAYBOOK

High-performing properties don't just host events.
They operate **tenant engagement systems**.

GatherUp partners with commercial office properties to design and manage strategic tenant activation programs that:

- Increase tenant participation
- Strengthen tenant satisfaction
- Support leasing differentiation
- Improve renewal conversations

Our team designs the **strategy, activation calendar, and operational systems** behind high-performing tenant engagement programs.
